

GOWTHAM ALASAKANI

Charlotte, NC | +17042013496 | Gowthamalasakani20@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with full SDLC experience delivering reliable, maintainable backend applications and services. Experienced building RESTful APIs, debugging production issues, and collaborating with cross-functional teams including QA, Business Analysts, and Project Managers. Proven ability to deliver clean, well-tested code in Python and Java within Agile environments, supported by AWS cloud infrastructure and modern CI/CD practices.

TECHNICAL SKILLS

Languages	Python, Java, SQL, JavaScript
Frameworks	Spring Boot, Node.js, Express.js, React.js
APIs & Integr	RESTful APIs, GraphQL, JSON, Postman
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, Jenkins, GitHub Actions
Dev Practices	OOP, SDLC, Microservices, Agile/Scrum
Testing	Unit Testing, Integration Testing, Test Plans, Regression
Tools	Git, GitHub, Jira, Version Control
Databases	MySQL, PostgreSQL, MongoDB

PROFESSIONAL EXPERIENCE

Data Engineer Jan 2024 – Dec 2024

Millennium Intech Private Limited | Chennai

- Developed and maintained backend data pipeline services in Python, integrating AWS (S3, EC2, RDS) for scalable ingestion of high-volume time-series data.
- Designed RESTful data service interfaces supporting downstream analytics and monitoring applications across engineering and operations teams.
- Refactored and optimised ETL pipeline codebase, achieving 40% reduction in processing latency through algorithmic improvements and efficient SQL query design.
- Applied OOP design principles and modular coding standards to build maintainable, testable pipeline components for production-grade deployments.
- Established data validation and quality standards within the pipeline, reducing downstream errors for reporting and decision-support systems.
- Collaborated with cross-functional teams using Agile/Scrum, participating in sprint planning, code reviews, and iterative delivery cycles.
- Diagnosed and resolved production-level data processing issues, performing root cause analysis and implementing fixes under SLA constraints.
- Maintained technical documentation for pipeline architecture, data models, and deployment procedures to support onboarding and knowledge transfer.

Software Development Intern

Jan 2023 – Jul 2023

InternPe | Bangalore, India

- Developed and tested RESTful APIs and backend logic using Node.js and Express.js, enabling the web application to handle increased traffic volumes.
- Debugged and resolved software defects across multiple service modules, improving application reliability and reducing error rates during integration testing.
- Collaborated with cross-functional engineers to implement feature enhancements using Agile methodologies, accelerating release cycles and feature stability.
- Participated in code reviews and applied development best practices to improve code quality, maintainability, and adherence to standards.
- Contributed to test plan execution and regression testing, validating feature correctness and application behaviour across environments.

- Maintained technical documentation and supported knowledge-sharing initiatives, contributing to team efficiency and onboarding clarity.

Web Application Developer – Freelance Assignment

Apr 2023 – Jun 2023

Oasis Infobyte

- Designed and delivered responsive web applications using HTML, CSS, JavaScript, React.js, and Bootstrap, meeting client specifications and improving usability.
- Integrated RESTful APIs and backend services to enable dynamic data rendering and seamless end-to-end application workflows.
- Optimised codebase through debugging, cross-browser testing, and Git version control, enhancing application stability and maintainability.

Data Analyst – Machine Learning

Apr 2023 – Jun 2023

Phoenix Global | Hyderabad, India

- Implemented supervised machine learning solutions in Python (Pandas, Scikit-learn), achieving 8% accuracy improvement through optimised training strategies.
- Conducted exploratory data analysis and feature engineering to prepare structured datasets for model training and evaluation workflows.
- Leveraged AWS EC2 compute resources for model training and evaluation, optimising resource utilisation and reducing iteration time.
- Evaluated model outputs against business objectives, translating technical results into actionable insights for cross-functional stakeholders.
- Documented ML pipeline architecture and evaluation methodology to support reproducibility and team knowledge transfer.
- Collaborated with team members to incorporate model findings into production decision workflows, supporting data-driven outcomes.

PROJECT

Plant Disease Detection – ML Project (Python, TensorFlow, OpenCV, Pandas)

May 2025 – Jun 2025

Northwest Missouri State University | Maryville, MO

- Architected and deployed an end-to-end ML pipeline (Python, TensorFlow, OpenCV) to classify plant diseases, improving accuracy 25% via dataset expansion and feature engineering.
- Optimised data processing and inference workflows, reducing latency 40% and enabling real-world deployment across 50+ agricultural sites.

EDUCATION

Northwest Missouri State University

Aug 2024–Dec 2025

M.S., Applied Computer Science

GITAM University

Sep 2020–May 2024

B.Tech, Computer Science and Engineering

CERTIFICATIONS

- Python for Data Science and AI — Coursera
- Introduction to Software Testing — University of Minnesota (Coursera), Jul 2023–Oct 2023
- Technical Support Fundamentals — Google (Coursera), Aug 2021–Dec 2021
- Fundamentals of Network Communication — University of Colorado System (Coursera), Sep 2021–Dec 2021

EXTRACURRICULAR & AWARDS

Computer Society of India (CSI)

Jan 2022 – May 2024

Core Member | GITAM University

- Best Presenter Award — Cloud Computing: AWS Workshop | GITAM University & Brainovision Solutions India Pvt. Ltd. | Feb 2023
